

BROKEN HILLS

IT IS PROBABLE that no mining discovery of recent years in Nevada has received such favorable endorsement by public officials, banking men and mining experts as has the Broken Hills mine in the new mining camp of Broken Hills in Churchill County, 48 miles north of Luning and 63 miles southeast of Fallon, Nevada.

Governor Emmet D. Boyle states over his own signature, after a personal examination of the Broken Hills property, that "The showing is the best I have seen in any new territory in Nevada for many years." The Chief Executive of Nevada is a well known mining engineer of high standing and his endorsement of mining projects, in their early stages, is unusual.

Arthur Perry Thompson, far-famed as a geologist at various times for the Anaconda Copper Mining Company, the Davis-Daly Copper Company, the Utah Apex Mining Company and for Bulkeley Wells, president of the American Mining Congress, after a ten-day examination of the property, also reports favorably.

Geologist Thompson says that development work to date reveals the presence of a vein of ore from three to nine feet wide that "averages better than \$15.00 per ton, as the ore is broken down in the mine without sorting," that "the vein is 2100 feet long," and that "there are ore deposits parallel to this vein on the property, one lens of which spreads out over an area of 120 feet by 140 feet in its greatest dimension, another 55 feet by 100 feet, and further south on the property repetitions of these lenses occur on a large scale."

Mr. Thompson's completely favorable report covers 25 typewritten pages.

WE CONDENSE from the reports of eminent geologists, engineers and other known experts who have recently made personal examination, the following description of the Broken Hills property.

The vein, 2,100 feet long, in the Broken Hills mine, has already been developed single-handed by the discoverers, Stratford and Arthur, at its

northern extremity, to a depth of 150 feet.

This portion of the vein has been proved along its strike for 350 feet by underground workings.

For another 250 feet south from these workings the vein has been developed to a depth of 50 feet by several shafts to a point where the vein is cut off by a fault and thrown westward to a new undeveloped position on the property.

In this faulted position where it is totally undeveloped, the vein can be traced for 1,500 feet further, or until another fault cuts it off and throws it again westward.

From the partially developed portion of the vein, which averages five feet in width down to the lowest level, more than 400 tons of high grade silver ore, averaging 130 ounces of silver per ton, have been extracted.

In these same workings and on the dump at the main shaft more than \$100,000 in ore of a profitable grade is already blocked out on three sides.

The vein from the lowest level up, averages over \$15.00 per ton as broken in the mine without any sorting of the waste rock broken with it.

Only a fraction of the exposed vein outcroppings has been explored. Where this has been done the vein in the lowest workings has been proved to be wider and as rich as it is nearer the surface.

Strong silver sulphide enrichment at a depth of 130 feet in the vein gives every indication of persisting to great depths between strong vein walls which are marked by the most pronounced evidences of deep-seated origin.

Wide areas in the hanging-wall and foot-wall of the vein are mineralized at the surface in the form of shattered lenses of ore that are measurable in hundreds of feet and may mean, after development underground another instance of masses of lower grade ore such as have been exposed in the late sensational developments on the Comstock Lode.

The vein matter and country rock strongly resemble that found with some of the rich silver developments

in Tonopah.

This property promises to develop, when deeper and more extensive lateral work is done to prove up the known veins and unknown parallel blind veins beneath the adjacent volcanic ash capping, into one of the important silver producers of Nevada, many of which in their infancy could not boast of the silver developments now to be seen at Broken Hills.

THE BROKEN HILLS SILVER CORPORATION has been organized with a capitalization of 3,000,000 shares to operate the Broken Hills mine. Underwriting of 2,000,000 shares of treasury stock by the Fidelity Finance & Funding Company, to net the Broken Hills Silver Corporation \$380,000 is for financing purposes, including acquisition of complete title, development of the mine to great depth and the erection of a hundred ton mill.

The president of the Broken Hills Silver Corporation is Ed Malley, Treasurer of the State of Nevada. The vice-president is Gilbert C. Ross, State Bank Examiner of Nevada. J. C. Goodin, cashier of the First National Bank of Lovelock, Nevada, is treasurer. C. E. Bingham is a director. Mr. Bingham is a director of the Bank of Fallon, Nevada, Eugene Grutt is secretary.

Arthur Perry Thompson, geologist, is chief of mining staff. Mine superintendent is William Frazee, formerly superintendent of the Nevada Wonder mine.

Among the initial stockholders of the Broken Hills Silver Corporation are the directors as above named; Hon. Emmet D. Boyle, Governor of Nevada; Herbert G. Humphrey, capitalist, known as the biggest individual land owner, mine owner, cattle and sheep raiser in Nevada, and a long list of other well-known and successful Nevada mining men.

For purpose of distribution and popularization, we are making an initial offering of a limited amount of stock of the Broken Hills Silver Corporation at 25 cents a share, prior to listing, and request IMMEDIATE acceptance.

FLAG DAY EXERCISES

Tonopah Lodge of Elks will celebrate Flag Day at the Airdome Sunday night with appropriate patriotic exercises. The American Legion will attend in a body as guests of the Elks. Following is the program that will be presented:

SUNDAY, JUNE 13th, 1920

AIRDOME

8:00 O'CLOCK P. M.

PROGRAM

OVERTURE—"Light Cavalry"	Orchestra
INTRODUCTORY EXERCISES	Officers of the Lodge
PRAYER	Chaplain
SONG—Selected	Mr. W. T. Oliver
"READING FLAG RECORD"	Bro. Wm. G. Gray
TROMBONE SOLO—"Lost Chord"	Orchestral Accompaniment
	Jos. F. Winneur
ALTAR SERVICE	Esquire and Officers
SONG—Selected	Lenore Sollender
"ELKS TRIBUTE TO THE FLAG"	Bro. Ben D. Luce
SONG—Selected	Bro. Ryder Ray
"PATRIOTIC ADDRESS"	Bro. Samuel W. Belford
PRESENTATION OF GOLD STARS	Bro. Mark R. Averill
SONG—"America"	Audience and Orchestra Accompaniment

HIDES AND WOOL AT A DISCOUNT

OKLAHOMA CITY, Okla., June 11.—Hide dealers here declare the hot ton has fallen out of the hide and wool markets.

Green salted hides which two weeks ago were selling for eighteen cents a pound have dropped to twelve. N. B. La Bryer, manager of a well established hide company here, says the price will go as low as ten cents, adding that the same conditions exist in all the markets of the country.

The wool market shows an even worse state of demoralization, according to Mr. La Bryer. Wool which a year ago ranged from fifty to fifty-five cents a pound now is virtually impossible to get twenty-five cents for, he states. The demand for wool is so slight he said, that no dealers are making purchases except where they get an opportunity to buy at such prices that they are willing to take a chance.

A recent attempt of the Wool Growers' association to hold a wool sale at Elgin, was called off because there were no buyers.

POLAND ABOLISHES THE GERMAN MARK

WARSAW, May 11.—Poland is to abolish the mark as the standard of currency which has been in use since the German occupation of Warsaw in 1915. The basis of Poland's new financial system is to be the zloty, normally about equal in value to the French franc. The zloty was the monetary unit more than 100 years ago, prior to Poland's partition by Russia, Prussia and Austria.

Dog Highly Prized in Alaska. Nowhere in the world has the dog such unrestricted right of way as in Alaska. In winter, when more than 600,000 square miles of territory are sealed up in solid ice, dogs are almost the sole means of getting from place to place—in fact, they seem necessary to life. The aristocrats of Arctic dog life are the mail teams in the service of the United States government.

MOVING CATTLE BACK TO NORTH

SAN ANGELO, Texas, June 11.—Solid train loads of well-conditioned cattle have almost daily been leaving points in West Texas over the Santa Fe, Orient and Texas & Pacific railroads for native pastures in the Northwest. They are from among the 175,000 or 200,000 animals that were brought into Texas last autumn when a drought laid its withering hand upon Wyoming, Montana, Idaho, Nebraska and neighboring states, and caused a failure of summer feed crops upon which the herds depended for subsistence during the winter.

This recalls the movement of cattle from Texas into the Northwest pastures under very similar conditions during 1916, 17 and 1918, when Texas was drought stricken, and the country which Texas served during the past winter offered hospitable pastures to starving Texas cattle.

CLUB WOMEN IN OLD CLOTHES

DEN MOINES, Ia., June 11.—The wearing of old clothes by the delegates to the fifteenth biennial convention of the General Federation of Women's Clubs, which opens here June 16 for a week's session, is urged by Mrs. Josiah Evans Cowles, president of the federation.

"War-time thrift must prevail, if we are to help right conditions. There is no need for a denim or gingham dress, which would simply make it harder for the women who really need such things. Make over what you have. Come to the convention with a story of thrift that will be a story of thrift that will be a story of thrift," said Mrs. Cowles in appeal.
